(+91) 9908849899 — Karimnagar, Telangana, India – 505001

Education

- **B.Tech (Information Technology)**, VNR VJIET, Hyderabad *Expected 2027*
Current Aggregate CGPA: 8.29 (5th Semester)
- **Class X**, Paramita Heritage School, Karimnagar *2021*
Aggregate CGPA: 67%
- **Class XII**, Sri Chaitanya Junior College, Karimnagar *2023*
Percentage: 97.8%

Skills

- **Languages & Frameworks:** Python, JavaScript, React, HTML, CSS, Bootstrap, Java, C, C++, MySQL, Node.js
- **Tools & Technologies:** Firebase, Android Studio, MySQL Workbench, REST APIs, Git, GitHub, Docker, AWS, Linux (Ubuntu), Shell Scripting
- **DevOps & CI/CD:** GitHub Actions, Jenkins, Docker-based CI/CD pipelines
- **Relevant Courses:** Web Design, Data Structures, DBMS, Computer Networks, ML, Algorithm Development

Projects

- **AI-Driven Customer Feedback Analyzer** *FastAPI, React, PostgreSQL, Docker*
Source Code: Private
 - Built an enterprise-grade AI platform to analyze customer feedback with sentiment, emotion, urgency scoring, and topic clustering.
 - Designed FastAPI backend, React dashboard, pgvector embeddings, and Redis + Celery for background ML jobs.
 - Integrated OpenAI/HuggingFace models for multilingual sentiment prediction and automated insight generation.
 - Containerized full system with Docker Compose supporting multi-tenant architecture and role-based access.
 - Implemented CI/CD workflows using GitHub Actions for automated testing and container builds.
- **AR Admin Dashboard – Flutter Web** *Flutter, Firebase, Firestore*
Source Code: Private
 - Developed a complete admin dashboard for managing AR albums, video assignments, and client authentication.
 - Implemented secure Firebase Auth roles, Firestore access rules, and Storage permissions.
 - Built real-time photo-video mapping using target IDs enabling AR applications to fetch mapped media instantly.
 - Created scalable project architecture with instant synchronization via Firestore and Firebase Storage.

Other Projects

- **Eye Controlled Mouse** — Python, OpenCV, MediaPipe Implemented an eye-tracking system enabling cursor control and click actions using blink detection and iris tracking.
- **WhatsApp Attendance Notifier** — Python, Selenium Automated WhatsApp alerts for student attendance using Excel integration and a Tkinter-based GUI.
